Degree: B.E - AI & DS

2024_28_III_OOPS Using Java Lab

2028_REC_OOPS using Java_Week 3_Q2

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9
Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
import java.util.Scanner;
class Main{
   public static void main(String[]args){
      Scanner scan = new Scanner(System.in);
      int b = scan.nextInt();
      int[][] a = new int[b][b];
      for(int i=0;i<b;i++){
         for(int j=0;j<b;j++){
            a[i][j] = scan.nextInt();
         }
      }
   }
   int main = 0;
   int sec = 0;
   for(int i=0;i<b;i++){
      main += a[i][i];
      sec += a[i][b - 1 - i];
   }
      System.out.println("Sum of the main diagonal: "+main);
```

```
        System.out.println("Sum of the secondary diagonal: "+sec);
    }
}
```

Status : Correct   *Marks : 10/10*
